

NOTE COUNTING MACHINE

MODEL: CX-444

FEATURES:

Introducing CX-444. This advanced machine is designed to deliver accuracy and reliability with every count. It features a clear LCD display for easy operation and is equipped with UV and 3MG sensors to ensure effective counterfeit detection. The CX-444 also includes a comprehensive range of detection functions such as power-on self-test, half-note, chain-note, double-note, and width detection, providing users with enhanced security and peace of mind.

The CX-444 is suitable for use with most currencies worldwide, thanks to its robust UV and 3MG detection capabilities. It is also capable of sorting both new and old versions of currency by utilizing different MG features, making it an ideal choice for businesses that handle a variety of banknotes. With its advanced technology and user-friendly design, the CX-444 is the perfect solution for efficient and secure currency management.

TECHNICAL SPECIFICATIONS:

- Counting Speed: 900 pcs/min
- Hopper Capacity: 120 old bills / 180 new bills
- Stacker Capacity: 120 old bills / 180 new bills
- Banknote Size: 50 × 110 mm – 90 × 180 mm
- Dimensions 310 × 265 × 200 mm
- Device Weight: 5.55 KGS / 6.75 KGS
- Power Supply: Single Phase 220V ±10% RMS, 50–60Hz
- Power Consumption: ≤ 80W
