Vacuum Packager

MODEL: DZ-260
 PRODUCT CODE: PBS-150

PRODUCT FEATURES

- Transparent lid provides clear visibility for packaging operations.
- Operation modes possible Vacuum only/vacuum and gas/seal and cutting only
- Compact design.
- Hygienic design easy to learn.
- Complete stainless-steel structure for max-min durability.
- Equipped with excellent vacuum system.
- Excellent sealing and film cutting system.

Model	DZ-260
Ultimate vacuum	0.05hpa
Vacuum chamber depth	50mm
Power supply	220v/50hz
Machine size	502x330x380mm
Motor power/heat sealing power	0.18kw
Sealing length	260mm
Heat sealing power	0.15kw
Sealing width	5mm
Machine cycle	20-40 sec
Net Weight	35Kg

ABOUT THE PRODUCT

DZ-260/PD desktop vacuum machine adopts microcomputer control, with vacuum, sealing, cooling once completed function, different packaging materials and different packaging requirements, the machine vacuum, heat sealing temperature, heat sealing time, etc. Adjust equipment for better packaging results. It is currently an ideal small vacuum inflatable packaging machine. The vacuum machine is made of all stainless steel and transparent plexiglass, making the packaging process clear at a glance.

Technical Characteristics

Microcomputer control system is used for setting precise and stable sealing time according to different packing materials and packing requirements, which is easy to operate.

Equipped with high efficiency vacuum pump, lower noise, and big capacity, our vacuum sealer works steadily and reliably.

The "V" shaped chamber lid gasket is made of high-density material, which ensures sealing performance.

Service life of sealing tape can be extended by using compressed and wearing resistance material, and change frequency can be also reduced.

The vacuum chamber is bright, clean, spacious and easy to clean.

The special labor-saving hinges on the lid markedly reduce the labor intensity of operator in daily work, so they can handle it with ease.
